

Jaltek Systems

# Software Developer, Epicor ERP

Luton LU3 3HP  
Full-time, Contract

Dynamic and creative problem solver required for a rapidly expanding manufacturing business.

We're looking for an experienced ERP individual from a manufacturing or software engineering background that can help us complete our implementation of Epicor E10.

Key skills related to this particular role:

- Proven experience of implementing & developing Epicor E10 within a manufacturing business environment
- Ability to quickly interpret existing business processes and help translate these activities into streamlined Epicor workflows
- Accomplished C# coding skills
- Fluent in designing BAQ / BPM's to support Business Process Flows
- Competent developing reports and outputs using Microsoft SQL Server Reporting Services

In reward we offer, flexible working arrangements, a competitive salary (depending on experience...) and the potential for the role to become permanent after 6 months.

If you think you fit the bill? Please reply at your earliest convenience with a CV and details regarding your current availability.

Contract length: 6 months

Expected start date: 01/03/2021
